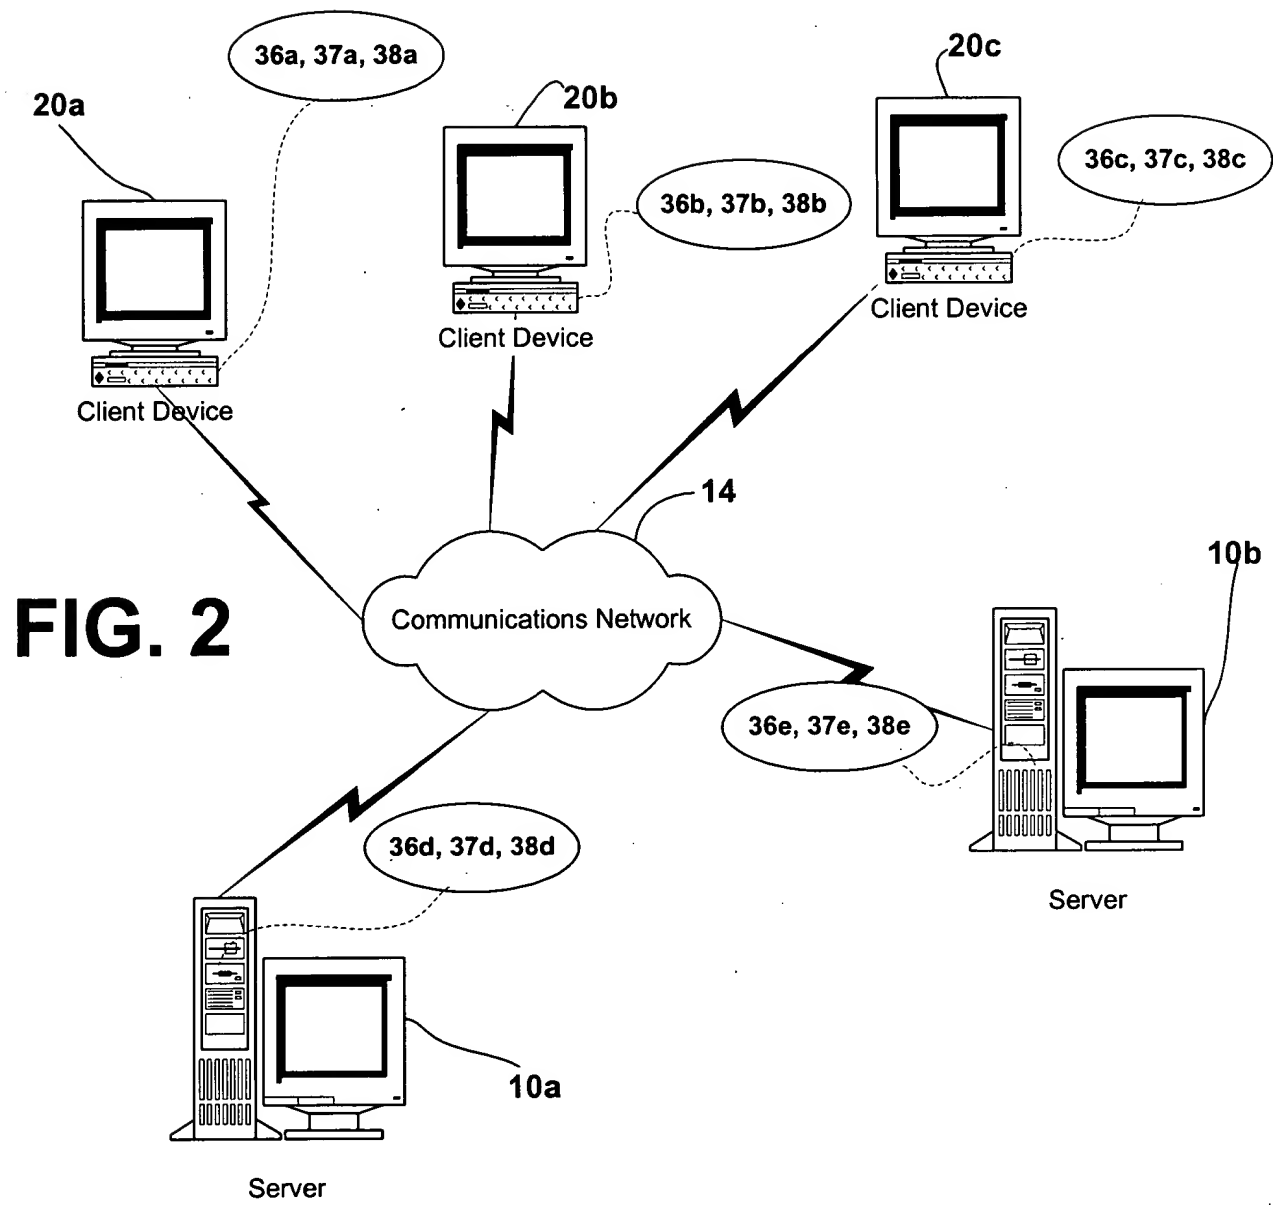

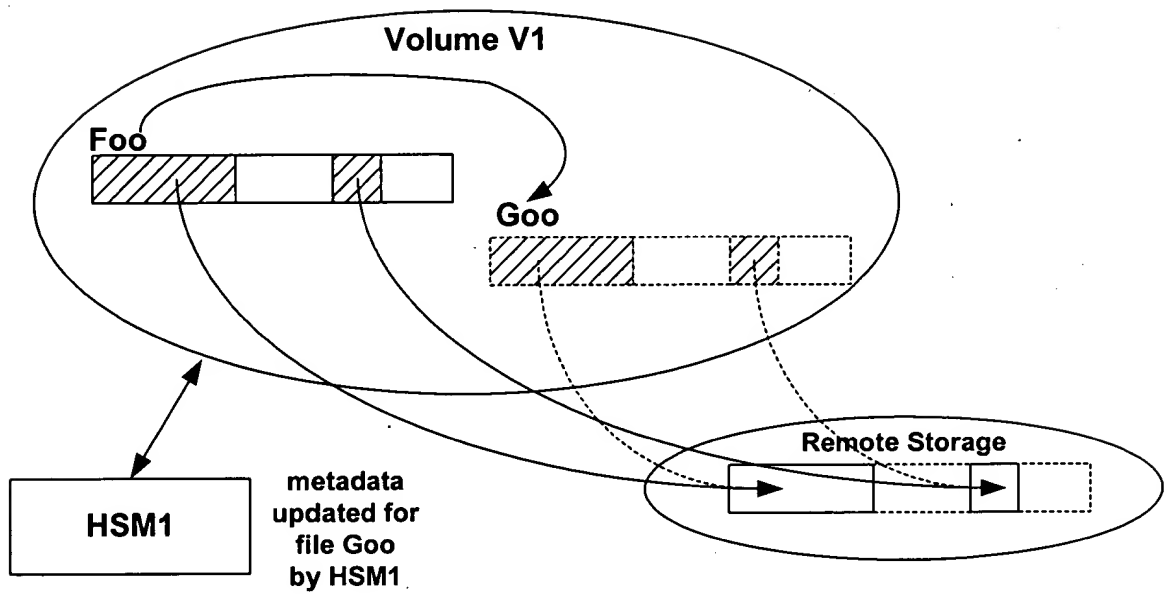

FIG. 2

FIG. 3

00445861.082400

400

Start

410

Request is made to
HSM1 to copy Foo to
Goo

420

HSM1 creates Goo,
sizes the file
appropriately and zeros
regions of the file
corresponding to
migrated data

430

HSM1 copies data in
foo's on-disk allocations
to corresponding byte
offsets in Goo

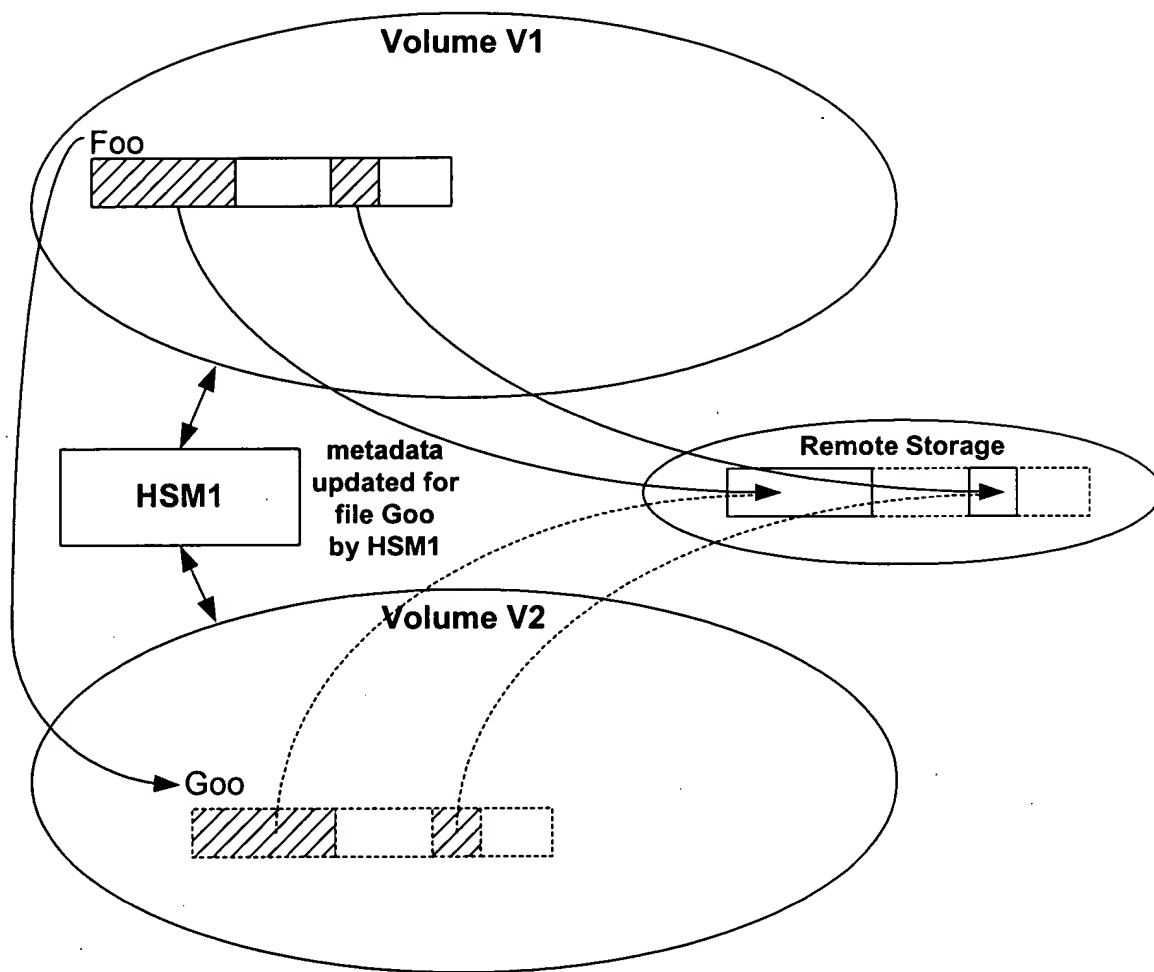

440

HSM1 updates metadata
describing Foo and Foo's
location to describe Goo
and Goo's location
